

corporate  
motorcycle leasing  
specialists

---

gridlock, traffic jams, road works,  
congestion, road pricing and car  
parks that are full by dawn!

these are the joys of motoring that confront the modern day commuter. This is also the arena in which modern businesses have to operate, especially those with clients or offices within towns and cities.

### a changing world

---

It is not simply the commuting to and from work. The urban traffic problem even affects the hour-to-hour efficiency of how a company operates. The use of a car in urban areas is becoming both expensive for fleet operators, who are taxed heavily, and inefficient for managers, who have to work with daily schedules that are almost works of fiction!

But organisations, large and small, now have a new option...

## a new approach to productivity

---

Motorcycle Management is the UK's only specialist motorcycle leasing company.

We are dedicated to giving executives and fleet managers the most efficient and cost-effective method of overcoming the logistical problems and increasing costs of urban and national transportation.

When used as part of an overall travel or logistics plan MM's services offer organisations increased efficiency combined with lower costs. Urban travel times can be reduced by up to 75% and motorcycles are also exempt from congestion charges.

## getting people to work

---

As the UK's only specialist in this area, we are able to offer corporate travel solutions specifically tailored to our customer's needs.

Different problems require different solutions and no two customers are alike. Therefore MM is able to offer travel solutions to both the executive wishing to supplement the company car, through the cost-effective addition of a motorcycle, or the manager utilising a rapid-response fleet to meet obligations of service level agreements.

Senior management will find the solutions offered by MM to be easily combined with their existing operations.

in every study undertaken, motorcycles have shown themselves to achieve shorter transit times than any other form of transport - and that includes public transport!

---

Key elements include:

▣ **Feasibility Study**

Through our expertise, MM is routinely consulted on risk assessment, health and safety and rider selection.

▣ **Contract Hire**

The most popular product, virtually risk-free and more flexible than most people think!

▣ **Service & Maintenance Packages**

A range of packages designed specifically for motorcycles, ensures you are always on budget for running costs.

▣ **Rider & Training Packages**

The most important aspect of motorcycle use, we design refresher courses to ensure your riders are qualified for their task.

▣ **Roadside Assistance**

We extend the manufacturers cover for the full life of the contract.

▣ **Implementation**

Bringing together all of the above to ensure seamless and efficient integration of motorcycles into the fleet.

- ▣ The UK's only motorcycle leasing specialists
- ▣ Variety of "On-Road" Packages
- ▣ Corporate and personal tax savings
- ▣ Accurate travel scheduling
- ▣ Lower overall costs
- ▣ Increased efficiency and productivity
- ▣ Avoidance of road pricing
- ▣ Environmental benefits

FACT. The use of motorcycles in an integrated vehicle fleet will result in cost savings, increased efficiency levels and improved customer service.
